👤 James Kekeli

Profile

I am a Computer Science student at Ghana Communication Technology University with a strong foundation in software development, programming, and network engineering. I have hands-on experience designing and developing responsive web applications, desktop software, and mobile applications using modern development tools and technologies. My background in General Science, combined with technical knowledge in networking and software engineering, enables me to approach problems with strong analytical and problem-solving skills. I am passionate about building innovative, user-focused solutions, collaborating in team environments, and continuously learning emerging technologies. I am eager to contribute my technical skills, adaptability, and commitment to excellence as an intern at Amalitech while gaining valuable industry experience in telecommunications and software development.

Skills

Web Development

- HTML, CSS, Javascript
- **Fullstack Framework:** Next.js, Django
- **Frontend Frameworks:** React, Tailwind CSS
- **Backend Framework:** Django Rest Framework, Express.js, Node.js

Network Engineering and Administration.

Mobile Development

- React Native
- Nativewind

Desktop Application Development

- C++ Desktop Application Development
- C++ / SQL Database Integration

Microcontroller Programming

Arduino Programming : C++/Javascript, sensor integration, motor control and serial communication
Embedded Systems : sensor integration, display interface, actuator control

Database Management Systems

MongoDB
MySQL

Projects

07/04/2026 – 04/2027

AffiliateShop [🔗](#)

Affiliate Marketing Ecommerce

Designed and developed a full-stack affiliate marketing platform that streamlines product promotion, referral tracking, commission management, and customer redirection to partner stores. Implemented secure user authentication, product and order management, payment tracking, and responsive user interfaces while applying RESTful API principles and relational database design to deliver a scalable e-commerce solution.

Technologies & Tools: Django, Django REST Framework, Next.js, SQLite, JWT Authentication, Firebase, Render, Cloudinary

01/05/2026 –
05/2026

BioAuth [🔗](#)

Mobile Fingerprint Registrar

Cross-Platform Biometric Registration System August 2025 – September 2025

Developed a cross-platform mobile application for Android and iOS that enables secure user registration and identity verification using fingerprint biometrics. Integrated biometric authentication APIs, implemented secure user enrollment and verification workflows, and optimized application performance for institutional, organizational, and electoral registration systems.

Technologies & Tools: React Native, Expo, SQLite, Biometric Authentication API (Local Authentication), REST APIs, Nativewind

26/08/2025 –
09/2025

FascoOnline

E-commerce

Engineered a full-stack multi-brand fashion e-commerce platform featuring secure authentication, product catalog management, shopping cart functionality, online payment integration, and customer account management. Designed RESTful APIs, optimized database operations, and built responsive user interfaces to deliver a reliable and scalable online shopping experience.

Technologies & Tools: Next.js, Django, Django REST Framework, SQLite, Stripe/Paystack API, JWT Authentication, Firebase Authentication,

19/10/2025 –
20/11/2025

SocketChat

Web-based chat application

Built a real-time web-based messaging application using WebSocket technology to provide low-latency communication between users. Implemented user authentication, contact management, online presence detection, and instant messaging while applying event-driven programming and client-server communication principles.

Technologies & Tools: Next.js, Socket.io , WebSockets, MongoDB, Firebase Authentication

19/10/2025 –
11/2025

SchoolManagementSystem

Designed and implemented a centralized school management system to automate student registration, attendance tracking, grade management, staff administration, and academic reporting. Developed secure role-based access control, CRUD operations, dashboard analytics, and database-driven workflows to improve operational efficiency and data management.

Technologies & Tools: Next.js, MongoDB, JWT Authentication, Firebase Authentication, Chart.js

04/03/2026 –
03/04/2026

TechMart

Tech Online Shop

Technology Products E-commerce Platform September 2025 – October 2025

Developed a scalable online marketplace for technology products supporting inventory management, categorized product listings, secure checkout, order processing, and customer account management. Implemented responsive interfaces, optimized database queries, and integrated secure authentication to enhance user experience and application performance.

Technologies & Tools: Django, Django REST Framework, Django-Unfold, SQLite, Next.js, Firebase Authentication

18/09/2025 –
10/2025

XianFlix

Cross Platform Mobile Application

Developed a cross-platform mobile application that enables users to browse, search, and discover movies using real-time data from external REST APIs. Implemented API integration, asynchronous data fetching, search functionality, and responsive user interfaces to deliver a fast and engaging mobile experience.

Technologies & Tools: React Native, Nativewind, Expo, Appwrite, TMDb REST API, Firebase

07/2025 – 07/2025	StudentPortal <i>Desktop Application</i> Developed a desktop student management application in C++ with SQL database integration for managing student records, course registration, and enrollment information. Implemented full CRUD functionality, relational database operations, input validation, and an intuitive graphical user interface while following object-oriented programming principles. Technologies & Tools: C++, C++/CLI Windows Forms, SQL Server, .NET Framework
-------------------	--

Education

01/2024 – present Tesano, Ghana	Bsc Computer Science <i>Ghana Communication Technology University</i>
09/2023 – 12/2023 Ho, Ghana	Diploma in Network Engineering and Administration <i>GCOM Institute of Technology</i> I pursued a Diploma in Network Engineering, focusing on computer networking, system administration and network security.
2020 – 2023 Ho, Ghana	General Science <i>Mawuli School</i> I studied Biology, Elective Mathematics, Chemistry, and Physics in senior high school, building a solid foundation in science.

Certificates

• Responsive Web Design 	• Javascript Algorithms & Data Structures
• Cybersecurity 	• Diploma in Networking and Administration
• MERN Stack Web Development
